Desmond Odhiambo

has successfully completed the online Specialization

Artificial Intelligence for Healthcare

The learner has developed practical skills for applying artificial intelligence and machine learning in healthcare. They gained hands-on experience in data preprocessing, model development, and evaluation for real-world clinical problems such as disease prediction and personalized care. The learner implemented complete machine learning workflows using Python, Jupyter Notebook, Google Colab, and Gradio, applying key ML libraries, multimodal healthcare AI, medical image analysis, Grad-CAM, and transformer-based models to design reliable, ethical, and clinically meaningful AI solutions.
